“I'd urge you all to visit the Sun Temple at Modhera. It will leave a lasting impact on your mind. The beauty of this place has to be seen to be believed. Earlier this evening inaugurated facilities that will enhance the experience for tourists.”

The heritage lighting and 3D projection at Sun temple will operate on solar energy as well.

PM Modi to declare Gujarat's Modhera as India's first 24x7 solar-powered village

Prime Minister Narendra Modi will be declaring Modhera in Gujarat as a 24 x 7 solar-powered village on October 9. Modhera will be India's first solar-powered village.

"I am happy that Gujarat has once again taken the lead in fulfilling the prime minister's vision of generating clean energy. We are committed to fulfilling his resolve of producing 50% of India's energy requirements through renewable energy by 2030," said Gujarat CM Bhupendra Patel.

About The Project

The central and Gujarat government initiated the solarisation of Modhera Sun Temple and town to provide round-the-clock solar energy through a solar power project integrated with Battery Energy Storage System (BESS) at Sujjanpura in Mehsana, nearly 6 km away from the Sun Temple.
